Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/057,420

Applicant(s)

LING, MARVIN T.

Examiner

Clement B. Graham

Art Unit

3696

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 February 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 and 19-44 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-17 and 19-44 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)

- 6) ☐ Other: _____

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/14/2009 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-17, 19-44, are rejected under 35 U.S.C. 102(e) as being anticipated by Ling U.S. Patent No: 7, 177, 838.

As per claim 1, Ling discloses a method for conducting electronic commerce transactions between a user and a plurality of vendors offering tangible goods, content, or services for rental or sale at a plurality of vendor web sites, the method comprising:
issuing a plurality of electronic tokens from a micro payment service provider server of a micro payment service provider to a user device suitable for use in micro payment transactions;
providing a plurality of micro payment user account at the micro payment service provider server to the user, each micro payment user account in the plurality of micro payment accounts storing a subset of the electronic tokens purchased with a different currency.(see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67) providing a micro payment vendor account to each one of the plurality of vendors for settling payments for electronic tokens used by the user; accepting, from a vendor server , a request at the micro payment service provider server for a micro payment transaction between the user device and the vendor for

specific tangible goods, content, or services, authorizing the micro payment transaction responsive to the request;
completing the purchase, responsive to the authorization(see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67) completing the purchase responsive to the authorizing of the tangible goods, content, or services from one or more of the plurality of vendors servers and for each electronic transaction between the user device and a vendor server, recording a royalty transaction in a corresponding micro payment vendor account at the micro payment service provider server (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 2, Ling discloses wherein a subset of the vendors offer content that is hosted at the vendor web sites, the method further comprising:
providing content to the user device in exchange for electronic tokens; and
for each electronic transaction, recording a royalty transaction for the content in a corresponding micro payment vendor account at the micro payment service provider server (see column 4 lines 1-40 and column 5 lines 51-67 and column 6-12 lines 1-67).

As per claim 3, Ling discloses further comprising maintaining a user database in the micro payment service provider server, the user database including micro payment user account information (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 4, Ling discloses further comprising maintaining a vendor database in the micro payment service provider server, the vendor database including Micro payment vendor account information (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 5, Ling discloses further comprising maintaining a transaction database in the micro payment service provider server comprising records of electronic transactions involving use of the electronic tokens at the plurality of vendor web servers(see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 6, Ling discloses wherein the electronic tokens are issued directly to the user device by the micro payment service provider server or through the plurality of vendor web

sites(see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 7, Ling discloses wherein the electronic tokens issued directly to the user device by the micro payment service provider server or through the plurality of vendor web sites comprise a plurality of incentive tokens, each incentive token in the plurality of incentive tokens designed to provide incentives to users at the sole discretion of the issuing party (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 8, Ling discloses wherein the micro payment service provider server provides each user a plurality of micro payment user accounts, and the plurality of micro payment user accounts are opened by the user through one or more of: a web site hosted at the micro payment service provider server; a link on the plurality of vendor web sites to the web site hosted at the micro payment service provider server; and a customer service representative of the micro payment service provider (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 9, Ling discloses wherein each micro payment user account in the plurality of micro payment user accounts stores a subset of the electronic tokens purchased with a different currency (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 10, Ling discloses wherein the micro payment service provider server provides a micro payment user interface to the user when the micro payment user account is opened by the user, the micro payment user interface allowing the user device to check the status of the micro payment user account (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 11, Ling discloses wherein the micro payment service provider server provides a micro payment vendor application program interface to the plurality of vendors servers when the micro payment vendor accounts are opened by the plurality of vendors servers , the micro payment vendor application program interface allowing the plurality of vendors vendors offer electronic tokens as a payment method to the user device (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 12, Ling discloses further comprising rewarding one of the plurality of vendors for attracting a user to use electronic tokens for an electronic transaction (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 13, Ling discloses wherein the micro payment service provider server facilitates user's purchase of content from the plurality of vendors without requiring multiple log-in and check-out procedures at each and every vendor web site server (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 14, Ling discloses wherein the micro payment service provider server enables a user to automatically dispute an unauthorized charge in the micro payment user account (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 15, Ling discloses wherein the user may add funds to the micro payment user account prior to or after purchasing tangible goods, content, or services from the vendor (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 16, Ling discloses wherein settling payments for electronic tokens comprises settling payments through the plurality of vendors servers according to a pre-determined amount threshold or time threshold (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 17, Ling discloses a system for conducting electronic commerce transactions between a user and a plurality of vendors offering tangible goods, content, or services for rental or sale at a plurality of vendor web sites, without the user having to disclose personal information to one or more of the plurality of vendors, the system comprising:
a micro payment service provider server, comprising:
a routine for issuing a plurality of electronic tokens from the micro payment service provider server;
a user database routine for updating records relating to the electronic tokens issued to [[the]]a user device(see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67) a vendor database routine for updating records relating to purchases made by the user using electronic tokens at the plurality of vendor web sites, a transaction routine for accepting a request requests from a vendor server for a transaction, the request identifying a specific user and specific tangible goods, content, or services, a verification routine for authorizing the

transaction(see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67) and a transaction database routine for updating records of electronic transactions involving use of the electronic tokens at the plurality of vendor web site a micro payment account user interface accessible on a user device or through the micro payment service provider server, and a micro payment vendor application program interface accessible on a vendor server (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 19, Ling discloses wherein the micro payment service provider server further comprises a routine for recording a royalty transaction for each electronic transaction conducted at the plurality of vendor web sites using the electronic tokens (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 20, Ling discloses wherein the micro payment service provider server further comprises a routine to compute the royalty to compensate the author, publisher or other owner of intellectual property of each content sold through the electronic transaction (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 21, Ling discloses wherein the micro payment service provider server further comprises a routine allowing the user to purchase content at the plurality of vendor web sites without requiring multiple log-in and check-out procedures at each and every vendor web site (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67). As per claim 22, Ling discloses wherein the micro payment service provider server further comprises a routine allowing the user to instantly view a summary of the user's purchases at the plurality of vendor web sites (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 23, Ling discloses wherein the micro payment service provider server further comprises a routine allowing the user to set a threshold for purchasing tangible goods, content, or services, the threshold comprising either a total amount per electronic transaction or a total spending amount within a predetermined time period (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 24, Ling discloses wherein the micro payment service provider server further comprises a routine allowing the user to set a spending threshold at a plurality of vendor web sites (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 25, Ling discloses wherein the micro payment service provider server further comprises a routine to access content from a user's summary of purchased content without requiring a user to re-visit the content provider's web site (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 26, Ling discloses wherein the micro payment service provider server further comprises a security routine that sets a pre-determined time period after the user logs in at the micro payment service provider server for allowing the user to purchase content at the plurality of vendor web sites (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 27, Ling discloses wherein the micro payment service provider server further comprises a security routine to prevent unauthorized downloading of content from the plurality of vendor web sites including encryption of a user login identification with a time variant encryption key. (see column 4 lines 1-40 and column 5 lines 51-67 and column 6-12 lines 1-67).

As per claim 28, Ling discloses wherein the micro payment service provider server further comprises a security routine to prevent unauthorized downloading of content from the plurality of vendor web sites including validation of a plurality of URL addresses corresponding to the plurality of vendor web sites, transaction data and user login identification by the micro payment service provider server (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 29, Ling discloses wherein the micro payment service provider server further comprises a routine providing security means to prevent unauthorized change of transaction data by creating a transaction ID for the transaction data and limiting transmission of the transaction data between the micro payment service provider server and the plurality of vendor web servers. (see column 4 lines 1-40 and column 5 lines 51-67 and column 6-12 lines 1-67).

As per claim 30, Ling discloses wherein the micro payment service provider server further comprises a routine for settlement of account with the plurality of vendors, according to pre-determined amount thresholds or pre-determined time periods (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 29, Ling discloses wherein the micro payment service provider server further comprises a routine for transferring tokens from one user's account to another user's account (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 30, Ling discloses wherein the electronic tokens are issued directly to the user by the micro payment service provider or through the plurality of vendor web sites (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 31, Ling discloses wherein the micro payment service provider server further comprises a routine for establishing multiple users within one user account, each of the multiple users having the same account privileges (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 32, Ling discloses wherein the micro payment account user interface comprises routines for allowing the user to check the status of a plurality of micro payment user accounts opened with the micro payment service provider (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 33, Ling discloses wherein the micro payment account user interface comprises one or more of: a web interface hosted at the micro payment service provider server; a client interface downloaded by the user from the micro payment service provider server; an interactive voice response system; and an offline interface with a customer service representative of the micro payment service provider (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 34, Ling discloses wherein the web interface and the client interface comprise screens for:
adding funds to the plurality of micro payment user accounts to pay for electronic tokens using multiple currencies, selecting a plurality of payment methods to add funds to the plurality of micro payment user accounts; selecting spending limits for the plurality of micro payment user accounts (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67) viewing a history of transactions recorded on the plurality of micro payment user accounts; disputing transactions recorded on the plurality of micro payment user accounts; and accessing the plurality of vendor web sites (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 35, Ling discloses wherein the plurality of payment methods comprise a plurality of online payment methods and a plurality of offline payment methods (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 38, Ling discloses wherein the plurality of online payment methods comprise one or more of: credit card payment; electronic check payment; electronic currency payment; and automatic debit on a plurality of bank accounts maintained by the user (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 39, Ling discloses wherein the plurality of offline payment methods comprise one or more of: check payment; money order payment; purchase order payment; payment by phone; payment through an Internet service provider providing Internet services to the user; payment through a utility company providing utility services to the user; and payment through bills mailed to the user by the micro payment service provider (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 40, Ling discloses wherein the micro payment account user interface further comprises an interface for allowing the plurality of vendors to manage a plurality of micro payment vendor accounts opened with the micro payment service provider (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 41, Ling discloses wherein the micro payment vendor application program interface comprises routines for the plurality of vendors to offer electronic tokens as a payment method to the user without having to install client software provided by the micro payment service provider (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 42, Ling discloses further comprising a routine for transmitting information from the plurality of vendor web servers to the micro payment service provider server when the user is purchasing a tangible good, content, or service at the plurality of vendor web sites, the information comprising information about each and every vendor from which the user is purchasing the tangible good, content, or service and information about the tangible good, content, or service (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 43, Ling discloses wherein the information about each and every vendor comprises one or more of: vendor login information; web form post parameter; response from the micro payment service provider server authorizing the purchase of the user; and other optional information for internal tracking purposes (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

As per claim 44, Ling discloses wherein the information about the content comprises one or more of:

title of the content; price of the content; short description of the content; content URL address; number of times to view the content; number of hours to view the content; number of days to view the content; expiration time of the content; and incentive IDs associated with the content (see column 5 lines 46-67 and column 6 lines 1-11, 29-43, 55-67 and column 7-8 lines 1-67).

Conclusion

RESPONSE TO ARGUMENTS

4. Applicant's arguments filed 2/26/09 has been fully considered but they are moot in view of new grounds of rejections.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clement B. Graham whose telephone number is 571-272-6795. The examiner can normally be reached on 7am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Dixon can be reached on (571) 272-6803. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
